DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 5, 2007 has been entered.

Response to Amendment

Applicant's amendments to claims 3,8,13, and 20 and new claim 21 filed in the RCE dated January 5, 2007 are noted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-5,8-11,13,15-17 and 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Guler (US 2002/0174052 A1).

Referring to claim 3. Guler discloses a method comprising:

- Providing information regarding an online auction to a computer system (abstract); and
- Predicting, by a software program executing on the computer system, an auction outcome for each of a plurality of potential feedback rules (figure 4 and paragraph 63);
- Allowing an auction end-user to select a feedback rule to implement from the plurality of potential feedback rules based on the predicted auction outcomes (paragraph 38); and
- Implementing a single auction using the feedback rule selected by the end-user (paragraph 68).

Referring to claim 4. Guler further discloses a method wherein predicting comprises modeling an outcome for each of the plurality of potential feedback rules (figure 4 and paragraph 63).

Referring to claim 5. Guler further discloses a method wherein modeling the outcome for each of the plurality of potential feedback rules comprises calculating a statistical distribution of possible outcomes for each of the plurality of potential feedback rules (paragraph 38).

Referring to claims 8-9. Claims 8-9 are rejected under the same rationale set forth.

Referring to claim 10. Guler further discloses a system wherein the processor predicts a final outcome for each of the plurality of feedback rules (figure 4 and paragraph 63).

Referring to claims 11,13,15-17 and 20. Claims 15-17 and 20 are rejected under the same rationale set forth above.

Referring to claim 21. Guler further discloses method wherein the predicting further comprises:

- Ranking, by the software program, each of the plurality of potential feedback rules based on the predicted outcomes (figure 10 and paragraph 66); and
- Providing the ranking to the auction end user (paragraph 66).

Response to Arguments

Applicant's arguments with respect to claims 3-5,8-11,13,15-17 and 20-21 have been considered but are moot in view of the new ground(s) of rejection.
